

Jason Ho - Project Portfolio Page

Overview

Manage instrument rentals faster than a typical mouse/GUI driven app! Keep track of stock, user rental history, and instrument-related finances in an all-in-one tracking app.

Summary of Contributions

[CodeContributed](#)

Enhancements Implemented

- **Feature:** Added `Instrument` functionality
 - `Instrument` , `Flute` , `Piano` and `Guitar`
- **Feature:** `RecommendCommand` for recommending instrument to user
- **Enhancements:** Various Exceptions for error handling
 - `NegativeUsageException` for `setUsage` in `Instrument`
- **Utils:** for utility
 - `CasingStandardiser`
- **Testing:** for relevant classes and methods
 - `RecommendCommandTest`
 - `NegativeUsageException`
 - `FluteTest` , `GuitarTest` and `PianoTest`
 - `UiTest`
 - `CasingStandardiserTest`

Contributions to UserGuide

- Explanation of `Recommend` command and feature

Contributions to DeveloperGuide

- Overall Architecture diagram
- `Instrument` , `Piano` , `Flute` and `Guitar` diagrams

Contributions to team-based tasks

- Active in team discussion, help to resolve issues with code for checkstyle or otherwise.
- Improve or refactor teammates' code
- Stress test program

Review contributions

- Help to review others Pull Requests
