

Kashfy Zul - Project Portfolio Page

Overview

Manage instrument rentals faster than a typical mouse/GUI driven app! Keep track of stock, user rental history, and instrument-related finances in an all-in-one tracking app.

Summary of Contributions

Features implemented

- Listing Features
 - `list stock` - List Instrument Stocks
Lists the total, rented and available quantity for all instruments in the database according to their INSTRUMENT_NAME Format: `list stock`
 - `list filter by:` - Filtered List of Instruments
Lists the relevant instruments according to the `FILTER` and `SEARCH_TERM` provided by the user.

Format: `list filter by: FILTER SEARCH_TERM`

- Possible combinations of `FILTER` and `SEARCH_TERM`
 - `FILTER : name , SEARCH_TERM : INSTRUMENT_NAME`
 - Filters instruments according to the specified `INSTRUMENT_NAME`
 - `FILTER : model , SEARCH_TERM : INSTRUMENT_MODEL`
 - Filters instruments according to the specified `INSTRUMENT_MODEL`
 - `FILTER : year , SEARCH_TERM : INSTRUMENT_YEAR`
 - Filters instruments according to the specified `INSTRUMENT_YEAR`
 - `FILTER : reserved ( SEARCH_TERM is not required)`
 - Filters instruments that `is_rented()`
 - `FILTER : available ( SEARCH_TERM is not required)`
 - Filters instruments that are not `is_rented()`
 - `FILTER : overdue ( SEARCH_TERM is not required)`
 - Filters instruments that `is_overdue()`
- `list help` - List All list Features
Lists all available `list` functionalities. A brief description for each command is included.

- Reserve Features
 - `reserve INSTRUMENT_NUMBER` - Reserves Instrument (Without Deadline)
 - `reserve INSTRUMENT_NUMBER from: START_DATE to: END_DATE` - Reserves Instrument (With Deadline)
- `extend` - Extend Reservation
- `return` - Return Instrument

User Guide
