
Teng Wai - Project Portfolio Page

Overview

Manage instrument rentals faster than a typical mouse/GUI driven app! Keep track of stock, user rental history, and instrument-related finances in an all-in-one tracking app.

Summary of Contributions

****Code Contributed****

Enhancements Implemented

- **Feature:** Added `User` functionality
 - `UserUtils`, `User` and `UserList`
- **Feature:** Storage for saving data
- **Enhancements:** `Ui` for main functionality
- **Enhancements:** Various cases of error handling
 - `IndexOutOfBoundsException` for `extend`, `reserve`, `finance`
- **Testing:** for relevant classes and methods
 - `User`, `UserList` and `UserUtils`
 - `Storage`, `FinanceStorage`
- **Testing:** implementation of mock child classes of existing classes (e.g., `StubUi`) to test code

Contributions to `UserGuide`

- Explanation of `User` commands and feature
- Bugfix
 - missing features
 - typos

Contributions to `DeveloperGuide`

- Acknowledgements
- Architecture diagram
- Example `Command` sequence diagram
- Design and Implementation

- User
- Storage
- IsOverdueChecker
- Logic Component
- Command Component
- Storage Component
- Other Notable Classes: IsOverdueChecker , User
- Appendix:Requirements
 - Product scope
 - User stories
 - Use cases
 - Non-Functional Requirements
 - Glossary
- Appendix: Instructions for manual testing

Contributions to team-based tasks

- Setting up the Github team org and repo
- Setting up tools (Github, Gradle)
- Updating developer docs
 - Overall architecture
 - Overall Design and Implementation
 - Appendix: Requirements
 - Appendix: Instructions for Manual Testing

Review/mentoring contributions

- Reviewed/made (informed) edits to UML diagrams
- Test features by other members:
 - extend , reserve
 - finance

Contributions beyond the project team

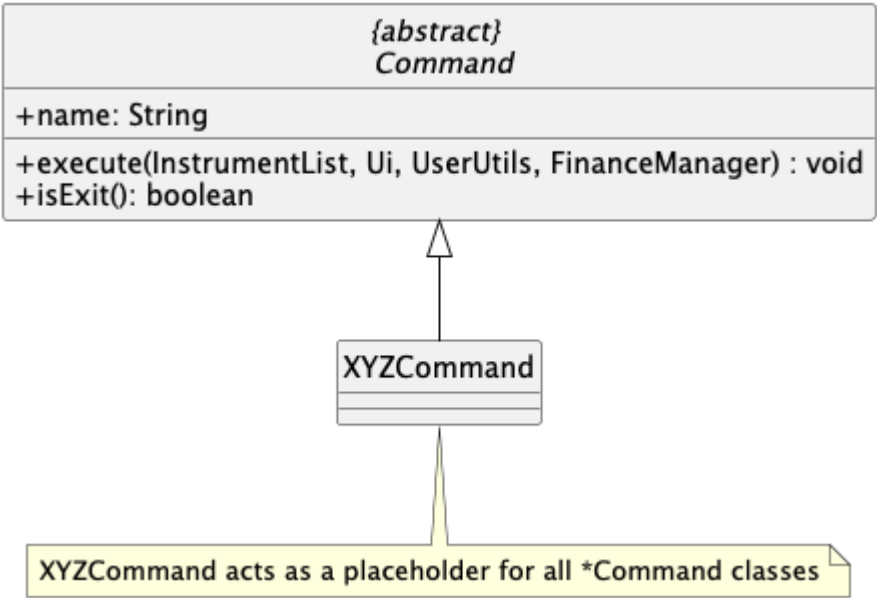

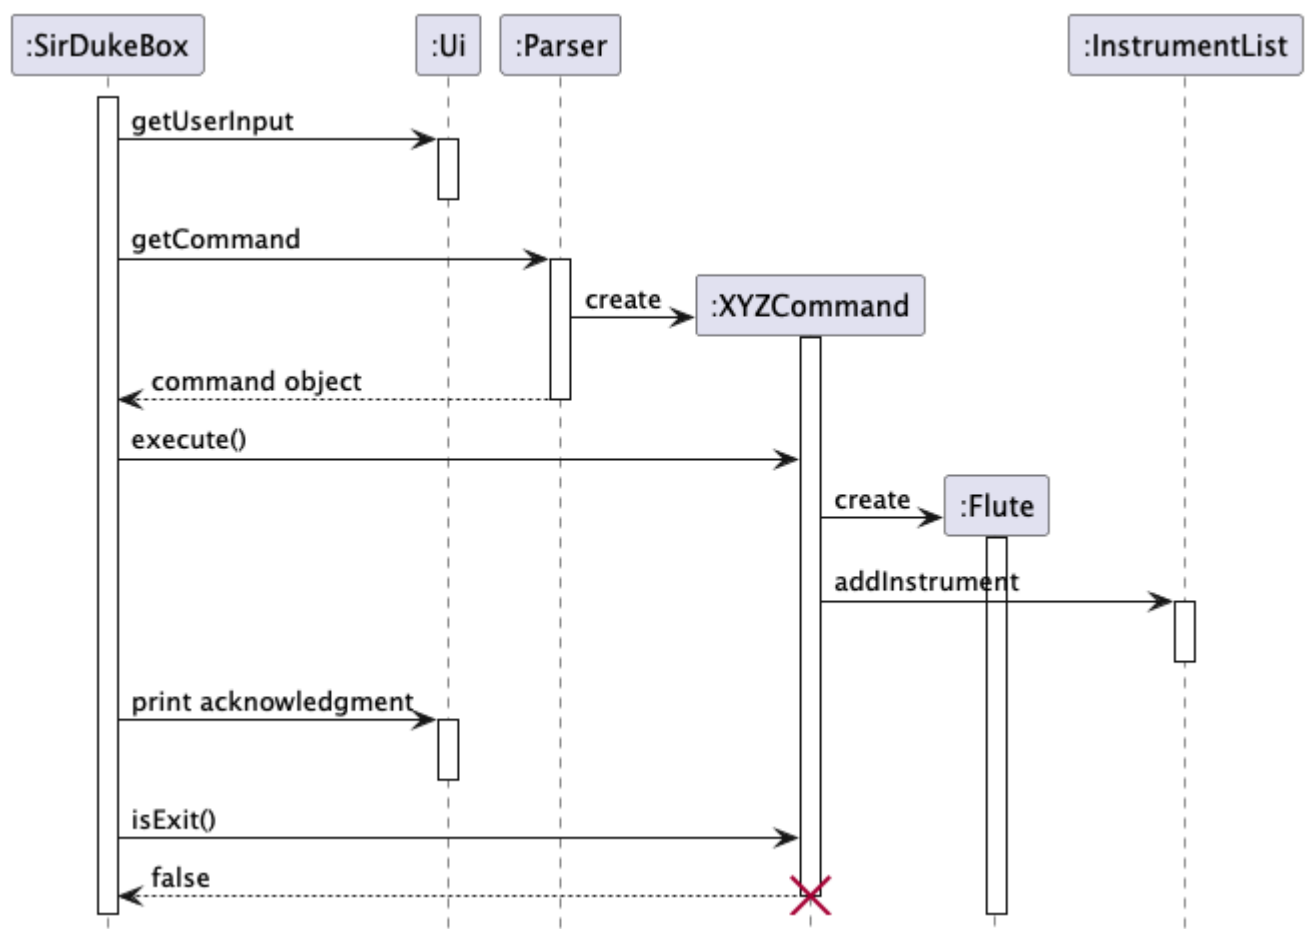

- Above-average number of PR peer review comments during iP PR peer review
- Submitted 18 issues during PE-D (top 10%)

Appendix

Contributions to the Developer Guide

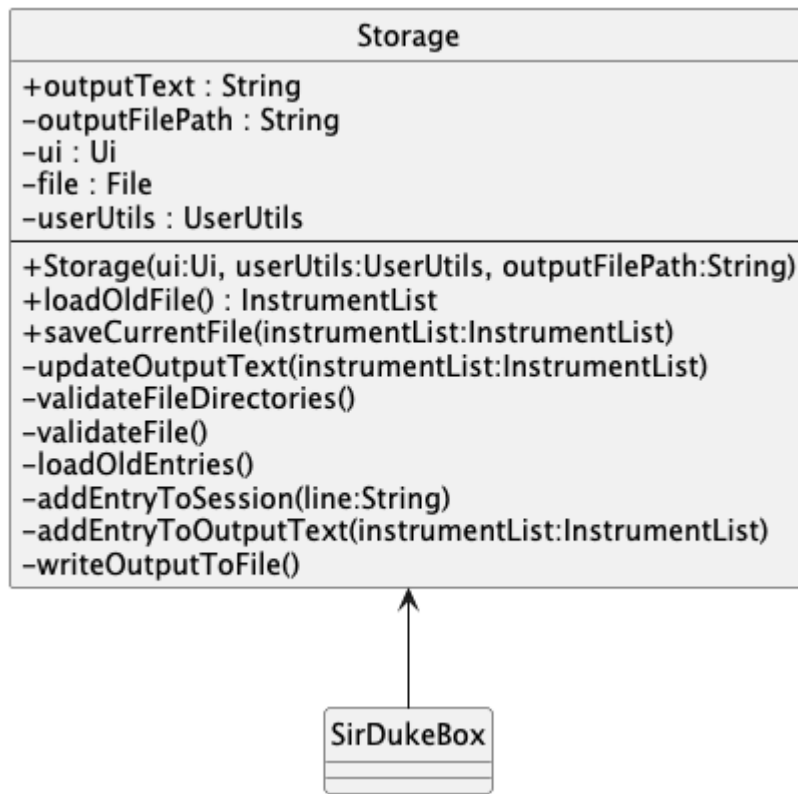

As much of the Developer Guide was written by me, I have opted to leave only the diagrams I have contributed in here.

System Architecture Example Sequence Diagram

IsOverdueChecker

Contributions to the User Guide

User

User commands - user

User will bring up a list of commands that pertains to users:

1. Adding a user
2. Removing a user
3. Listing all users
4. Listing a user's instruments

...which is selected by inputting the index of the command and > following onscreen instructions

For option 4, the user will be able to choose from 2 lists:

1. Rental History
 - This is the list of all instruments that have been added to the user during the current session (including deleted instruments)
2. Currently Instruments
 - This is the list of instruments still allocated to the user > (modified after deleting)

For example, if the current list of instruments assigned to the user is:

1. Guitar | Yamaha | 2000
2. Piano | Yamaha | 2000

...and delete 2 is inputted, CurrentInstruments will be:

1. Guitar | Yamaha | 2000

...while RentalHistory will be:

1. Guitar | Yamaha | 2000
2. Piano | Yamaha | 2000

Example of usage:

Input:

user

Expected output:

[illegible]

Input:

4

Expected output:

```
*+*=+*-+=+-*-+=+-*-+=+-*-+=+-*-+=+-*-+=+-*-+=+-*-+=+-*-+=
```

Please select from the following existing users:

1. Teng Wai
2. Om
3. Kashfy
4. Jason

Input:

1

Expected output:

```
*+~+~*-+~+~*-+~+~*-+~+~*-+~+~*-+~+~*-+~+~*-+~+~*-+~+~*-+
Available List Choices:
1. Rental History
2. Current Instruments
```

Input:

1

Expected output:

[illegible]

1. Piano | Yamaha | 2000 |

[illegible]

...or if list is empty:

[illegible]

This list is empty :(

[illegible]
