

Om J Ramdas - Project Portfolio Page

Overview

Manage instrument rentals faster than a typical mouse/GUI driven app! Keep track of stock, user rental history, and instrument-related finances in an all-in-one tracking app.

Summary of Contributions

Code contributed

Enhancements Implemented Feature: `Parser` functionality, handle input from `ui` to choose respective command

- **Feature:** `CommandParser` functionality, interprets command pass back the respective parameters
- **Feature:** Added Command Handler functionality
 - `Generic Command` , `DefaultCommand` , `ExitCommand` , `HelpCommand`
 - Instrument Command: `addInstrumentCommand` , `DeleteCommand` , etc
- **Feature:** Added Finance functionality
 - `FinanceManager`
 - `FinanceStorage`
 - `FinanceCommand`
- **Feature:** `isOverDue` functionality to check if an instrument is overdue
 - Implemented a daily check
- **Enhancements:** `ui` for main functionality
- **Enhancements:** Various cases of error handling
 - `Commands`
 - `Finance`
 - `Instruments`
- **Testing:** for relevant classes and methods
 - For all work done above as well as exceptions

Contributions to UserGuide

- Explanation of `Finance` commands and feature

Contributions to DeveloperGuide

- Overall Architecture diagram
- Ui diagram
- Finance Manager diagram
- Parser diagram

Contributions to team-based tasks

- Planned team meetings related and created issues for the team to solve

Review contributions

- Code review for other components
- Major Refactoring to make code better OOP wise
